## Who we are

A software house that answers the phone

HT Digital Solution builds the systems that Pakistani factories, shops and offices run on every day. We are based in Faisalabad and work across Pakistan, on site where it matters and remotely where it is faster.

The business grew out of years of hands-on Oracle work inside real companies: textile units, dyeing and processing floors, distribution warehouses and retail counters. Not consulting from a distance, but sitting with the storekeeper entering the issue slip and the accountant reconciling it at month end. That is why our systems follow the sequence your staff already use.

**15+**

years Oracle experience

**100+**

custom reports built

**7**

service lines

**24h**

## HOW WE WORK

### 01 Free consultation

A call or a visit. We listen to your process and show a working demo of something similar. No charge, no obligation.

### 02 Scope and fixed quote

A written module list, timeline and price. What is included, and what is not, on paper before anyone starts.

### 03 Build and review

Delivered in stages. You test each one with your own data while changes are still cheap.

### 04 Deploy, train and support

Installed on your server or the cloud, old data migrated, staff trained. Then we stay on.

## INDUSTRIES WE WORK WITH

Textile and garments · Dyeing and processing · Manufacturing · Schools and colleges · Hospitals, clinics and pharmacies · Retail and wholesale · Distribution · Hotels and restaurants · Construction · Transport and logistics · Trading and services

## What we do

Seven service lines, each available on its own

### Oracle APEX & ERP Development

From PKR 600,000

Full ERP modules on Oracle APEX: production, inventory, accounts, sales, purchase and costing, built around your existing process.

### POS & Inventory Management

From PKR 120,000

Barcode counter billing, live stock, multi-branch transfers, supplier ledgers and day close, for one shop or a chain.

### HRM, Payroll & Attendance

From PKR 200,000

Biometric device sync, shift and overtime rules, leave ledger, salary sheets and bank transfer files.

### FBR Digital e-Invoicing

From PKR 150,000

IRIS API integration into your existing software: QR invoices, retry logs, sandbox testing and production go-live.

### AI Agents & Automation

From PKR 175,000

AI calling agents, WhatsApp and web chatbots connected to your live database, plus document and reporting automation.

### Reports, Dashboards & Migration

From PKR 15,000 per report

Oracle Reports and APEX dashboards, Excel export, query tuning, and migration from Excel, Access, SQL Server or legacy Oracle.

### Networking, CCTV & IT Support

From PKR 12,000 per month

Server setup and hardening, automated backups, office LAN and Wi-Fi, CCTV, and remote or on-site support contracts.

## Working with us

Pricing, ownership and support

### INDICATIVE PRICING

|                                                |                                |            |
|------------------------------------------------|--------------------------------|------------|
| Starter - POS or basic inventory, one location | <b>from PKR 120,000</b>        | 2-4 weeks  |
| Business - multi-module ERP with production    | <b>from PKR 600,000</b>        | 2-4 months |
| Enterprise - multi-unit / multi-location       | <b>from PKR 1,500,000</b>      | 4-8 months |
| Annual support contract                        | <b>from PKR 12,000 / month</b> | ongoing    |

Prices exclude hardware, third-party licences and applicable taxes. The figure is fixed once the scope is agreed in writing, and moves only if the scope moves with your approval. Billing is staged against delivery: you pay for a module when you can use it.

### WHAT YOU OWN

- Your data is yours, before, during and after the engagement.
- The custom application built for you is yours to use, with no per-seat fee to us.
- You receive the database credentials and the backups.
- Host it on your own server in your own office if you prefer. No lock-in.
- We are happy to sign your NDA before work starts.

#### Next step: a free scoping call

Tell us the modules you need and you will have a written fixed quote, usually within two working days. Or build an indicative quote yourself in a minute at [htdigitalsolution.com/quote.html](https://htdigitalsolution.com/quote.html)
